

The background of the entire page is a composite image. The top half shows a city skyline at night with several tall buildings and a river. The bottom half shows a highway interchange with light trails from cars. Overlaid on both images are several white, glowing arcs that connect different points, suggesting a network or data flow.

## UT and UTR series

M30 cylindrical direct di use & retro-re lective  
Ultrasonic Sensor with Teach-In button

## features

- M30 ultrasonic sensor with standard housing and with large front with high performances and high sensing distances
- Adjustable hysteresis function: models with double digital programmable output specific for level detection
- Models with voltage or current output: programmable slope to optimize resolution
- Adjustable working area (window mode or object mode) by Teach-in button on all models for a quick and easy installation
- Two multifunction LEDs: orange LED for adjustment procedure and output type and green LED for target alignment
- Plastic and AISI 316L stainless steel housing, plug M12 or cable exit 4 pin

## models with single digital output

## models with single analogue output

## models with digital output + analogue output <sup>(1)</sup>

## models with double output, hysteresis + standard window <sup>(2)</sup>

<sup>(1)</sup> Suitable, also, as single model output.  
<sup>(2)</sup> In the double digital output model with the standard window and adjustable hysteresis functions if the target is removed from sensor detection range, the output type switches. These models are not foreseen with NO/NC function.
