MLAS - Machine Learning Assisted Setting

THE SMART VISION SENSOR ENABLED WITH A.I. AND EMPOWERED BY MACHINE LEARNING ASSISTED SETTING ALGORITHMS. SIMPLY CLEVER SOLUTION FOR ALL YOUR PRESENCE AND ORIENTATION OBJECT DETECTION APPLICATIONS

- Machine Learning Assisted Setting
- No vision Tools programming required
- No inspection threshold adjustment
- No need of skilled installers and users
- Fast and Easy Setting like standard photosensor
- Deterministic response time 50ms
- Reduced cost of ownership and maintenance
- TEACH Button and comprehensive UI with 5 status LEDs
- Electronic focus control
- 50...150mm operating distance
- Bright and visible Red LED pointer
- Powerful white polarized light illuminator
- Green/Red LED Spot for GOOD/NO GOOD part
- Ethernet point to point communication available
- Easy and Intuitive WEB Server GUI for maintenance and job setting
- Easy output interface photosensor like

APPLICATIONS

- Processing and packaging machinery
- Transport and handling lines
- Assembly lines
- Food & Beverage
- Bottling lines
- Machines for the Cosmetic and Pharmaceutical sector

ELECTRICAL FEATURES

Power	
Supply Voltage (Vdc)	10 to 30 Vdc
Consumption (A) Max.	0.40 - 0.14 A (4.2 W)
Communication Interface	
Ethernet ¹	10/100 Mbit/s
Inputs	
Max. Voltage	Opto-coupled and polarity insensitive
Max. Input Current	30 Vdc
Output Type	10 mA
Outputs	Push-pull, NPN or PNP, short circuit protected
$V_{OUT} (I_{LOAD} = 0 \text{ mA}) \text{ Max.}$	3 Outputs (DATA VALID, GOOD, NO GOOD)
$V_{OUT} (I_{LOAD} = 100 \text{ mA}) \text{ Max.}$	30 Vdc
$I_{LOAD} \text{ Max.}$	3 Vdc
	100 mA

¹ The embedded Ethernet interface is intended for configuration only through connection to the device IP. Point-to-Point connection is recommended.

TECHNICAL DATA

Optical and Detection Features	
Operating distance	50...150 mm
View angle	19°
FOV area @ 50 mm	22 mm (H) x 16 mm (V)
FOV area @ 150 mm	55 mm (H) x 41 mm (V)
Response Time	50 ms
Max. Image to handle (GOOD+NO GOOD)	6 images
Max pcs per second	20 pcs per second
Active Area Resolution	320x240 pixels
Illuminator	White LED polarized
Phisical Features	
Dimensions	H x W x L
Std SPH connector at 0°	78 x 47 x 38 mm (3.1 x 1.9 x 1.5 in)
Std SPH connector at 90°	58 x 47 x 58 mm (2.3 x 1.9 x 2.3 in)
Weight	173 g (6.1 oz)
Material	Aluminum with plastic PMMA protective window
Environmental Features	
Operating Temperature ²	-10 to 50 °C (14 to 122 °F)
Storage Temperature	-20 to 70 °C (-4 to 148 °F)
Max. Humidity	90% non-condensing
Vibration Resistance	14 mm @ 2 to 10 Hz; 1.5 mm @ 13 to 55 Hz; 2 g @ 70 to 500 Hz; 2 hours on each axis
Shock Resistance	30 g; 11 ms; 3 shocks on each axis
Protection Class ³	IP65 and IP67

1 The embedded Ehternet interface is intended for configuration only through connection to the device IP. Point-to-Point connection is recommended.
2 High ambient temperature applications should use metal mounting bracket for heat dissipation.
3 When correctly connected (fully tightened) to IP67 cables with seals.

DIMENSIONS

Smart-VS STRAIGHT CONNECTORS

SMART-VS 90° CONNECTORS

CONNECTIONS

M12 17-pin Power and I/O Connector Pinout*			
Pin	Name	Color	Function
1	Vdc	Brown	Power supply input voltage +
2	GND	Blue	Power supply input voltage -
Connector case	Chassis		Connector case provides electrical connection to chassis
6	I1A	Yellow	I1A Trigger Input A (polarity insensitive)
5	I1B	Pink	I1B Trigger Input B (polarity insensitive)
13	I2A	Green	I2A Remote Teach A (polarity insensitive)
3	I2B	White	I2B Remote Teach B (polarity insensitive)
9	O1	Red	Data Valid PP
8	O2	Gray	GOOD Output PP
16	O3	Black	NO GOOD Output PP

* The wire colors are referred to cables P/N 95A900052 and 95A900053

M12 8-pin Standard Ethernet Network Connector Pinout		
Pin	Name	Function
1	TX+	Transmit data (positive pin)
2	TX-	Transmit data (negative pin)
3	RX+	Receive data (positive pin)
4	RX-	Receive data (negative pin)
5	nc	Not Connected
6	nc	Not Connected
7	nc	Not Connected
8	nc	Not Connected

INDICATORS AND SETTINGS

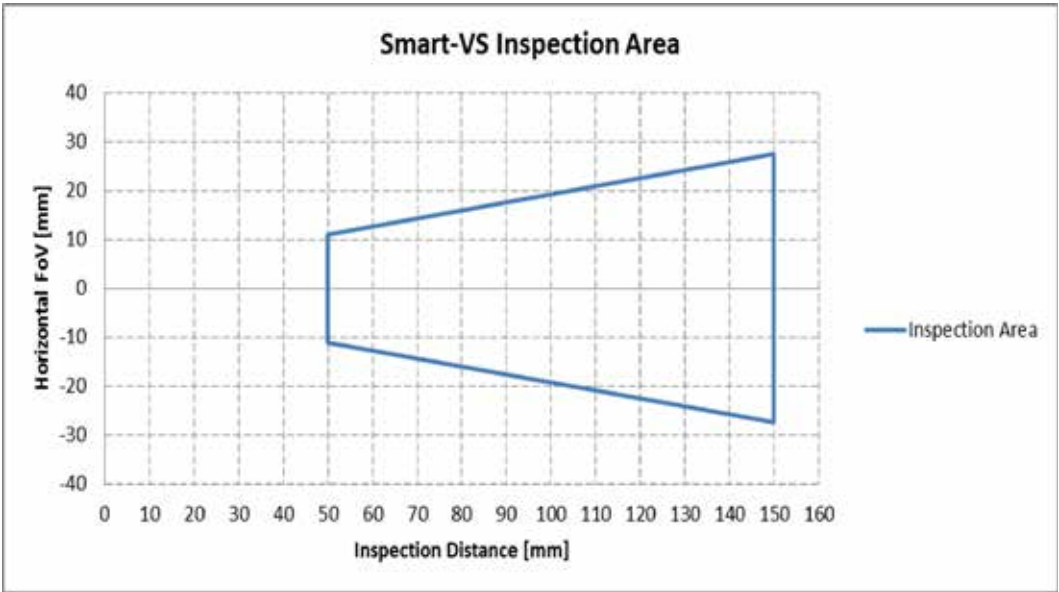

ITEM N.	DESCRIPTION
1	Illuminator with 4 powerful White LEDs with polaroid filter
2	7mm lens with automatic focus system
3	Aiming system with 2 powerful Red LEDs
4	Red Spot illuminator LED for NO GOOD detection object
5	Green Spot illuminator for GOOD detection object
6	2 holes for direct mounting or bracket
7	Blue Power Supply LED
8	Yellow Ethernet connection LED
9	M12 Ethernet X-coded female connector
10	Rotating connector block
11	M12-17 Pin Power Supply and I/O male connector
12	5 bright LED for User Interface signalization
13	Yellow TEACH-IN button for sensor set-up

HMI CONFIGURATION	
	NO GOOD object <ul style="list-style-type: none">• blinking: NO GOOD object teaching• in Run phase: NO GOOD object detected
	For future use
	Trigger <ul style="list-style-type: none">• trigger received
	GOOD object <ul style="list-style-type: none">• blinking: GOOD object teaching• in Run phase: GOOD object detected
	Run <ul style="list-style-type: none">• device in RUN phase

DETECTION DIAGRAMS

FIELD OF VIEW CALCULATION

Use the data in the following table to calculate the FOV for your application, referring to the draw and the formula below.

D_0	View angle horizontal	View angle vertical	View angle diagonal	Min Reading Distance mm
11 mm	19°	14,5°	24°	50 mm

The viewing angle has a tolerance of $\pm 1^\circ$ depending on the reading distance.

$$FOV_x = 2 [(d + d_0) * \tan (\alpha/2)]$$

where:

FOV_x = horizontal, vertical or diagonal FOV

α = horizontal, vertical or diagonal viewing angles.

d = reading distance (in mm) from window surface to code surface

d_0 = offset (in mm) from center of lens to external window surface

Example:

The FOV at a **reading distance of 100 mm** is:

$FOV_H = 2[(100\text{mm} + 11\text{mm}) * \tan(19^\circ/2)] \cong 37\text{mm}$

$FOV_V = 2[(100\text{mm} + 11\text{mm}) * \tan(14,5^\circ/2)] \cong 28\text{mm}$

OPERATING PRINCIPLES AND APPLICATIONS

Smart-VS simply clever

The Smart-VS is a Smart vision sensor simple and clever. It is simple outside since it can be handled and used like a standard photoelectric sensor but powerful and smart inside with a multiprocessor platform supporting and embedding the Artificial Intelligence technology. Its customized machine learning algorithms are empowering the detection system core enabling very complex and accurate object classification ensuring at same time a very simple setting procedure by the user

The user does not have to take care about programming or setting threshold of different vision tools, all these complex functionalities are operated by the Smart-VS "brain".

The detection function will be accomplished with three easy and fast steps. The quick step is the GOOD condition teaching the second step is no good condition teaching the third will turn the sensor in learning and normal run status ready to detect GOOD or NO GOOD objects. The user will just present the objects in front of sensor eye and push the button to change acquisition steps until the sensor will start to think and act.

The sensor is especially suited for all the applications where it is needed to solve detection between two well specified object condition classes, like presence or absence of a specific feature or object orientation respect two sides, teaching the sensor with GOOD and NO GOOD condition.

The Smart-VS principle of working is to teach the sensor with GOOD and NO GOOD object condition, this is the basic rule for any application.

This is the reason why it can be used in an effective and reliable way for the presence/absence of object features for side orientation of objects referring to proper object attributes.

This working principle makes the sensor setting easy and independent by the type, material, color of the object that needs to be detected.

Application name		Solved cases (OK / NOT OK)	
Check label presence			
Cap orientation			
Cap presence			
Check printing on label			

The main application targeted for the best use of the Smart-VS is mainly related to print and apply application where it is needed to detect presence or absence of Labels or text printing.

Liquid filler machineries where it is needed to detect the presence/absence of any kind of cap on any kind of bottles, vials, flasks, phials of any material, does not matter if made of glass, plastic or with bright dark color shiny surfaces and different dimensions. Just make the sensor teach and learn the GOOD/NO GOOD condition and it will work. You do not need to set vision tools, sensitivity thresholds, image exposition, focus, sensor positioning or sensor sensitivity.

Bottling machines where it is needed to check if the label is present or not on the object making the sensor learning the presence/absence and then make it work immediately without additional settings, just pressing a push button or building up different receipts for different formats with an effective and easy WEB GUI interface.

Application name	
Check label presence	
Cap orientation	
Cap presence	
Check printing on label	

A great value for all the applications

The Smart-VS redefines the standard detection eliminating all the concerns regarding the use of standard sensors about unstable detection or complex installation layouts to perform the presence/absence or orientation applications, a Smart-VS based system will ensure:

- more stability in terms of different object materials and shape
- excellent stability on glass and metal parts
- more simple system installation
- more flexibility and adaptability about different production format
- easy setting avoiding more expensive and complex devices
- lower cost of ownership and maintenance

SMART-VS SETTING METHODS

Easy and Comprehensive system integration

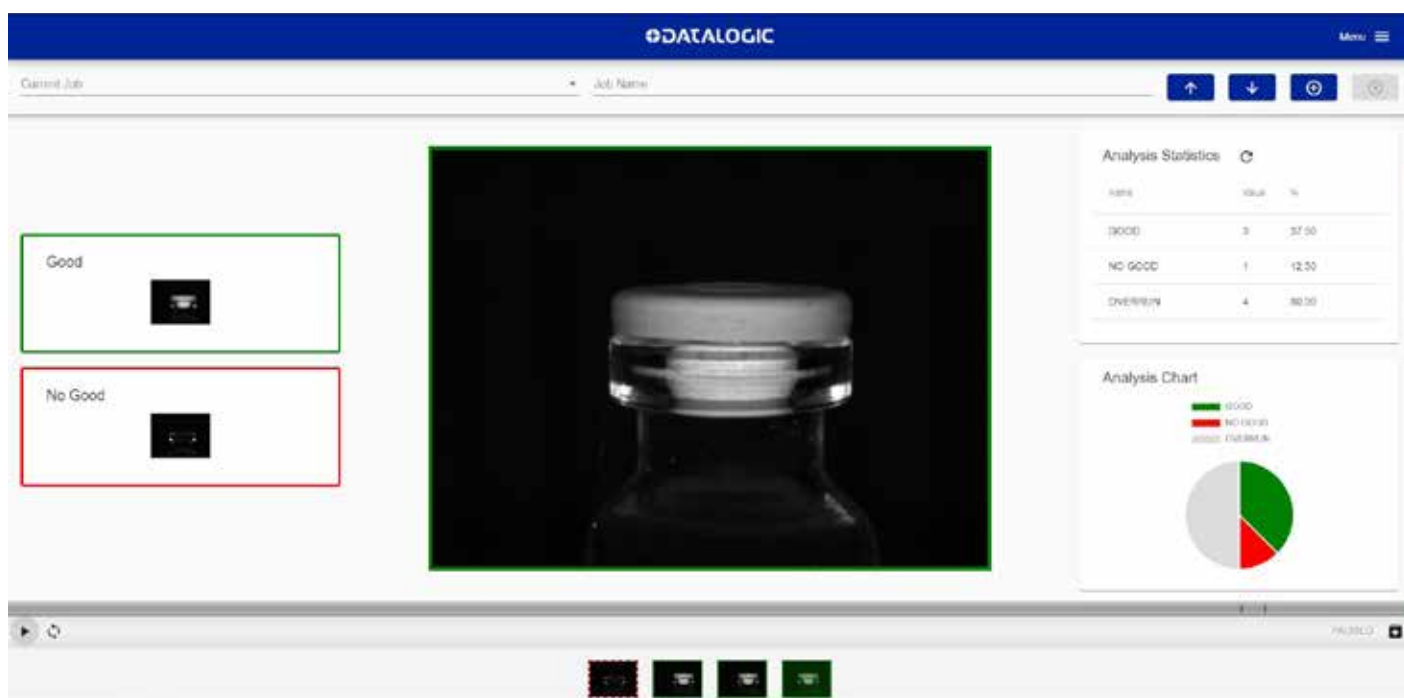

The Smart-VS is very easy and simple to integrate in any application, it can be implemented like a sensor product, but it is much simpler than a smart camera or an ordinary smart sensor.

It is needed to provide a trigger signal by machine electrical phase or an external simple sensor or an encoder. The PC or Ethernet based terminal is an option needed to change configuration of the sensor (once a time) or for more complex set-up where it is needed to change and/or add job setting through the web interface with a browser, in most cases the need to have this connection is not necessary.

The web interface can be a useful tool in case of trouble shooting

WEB INTERFACE

The Smart-VS is provided of a WEB Server User interface for an easy set-up and setting. This is a good option feature when it is needed to setup and change different production jobs depending on variable production format. The information are complete and shown in a clear layout.

MODEL SELECTION AND ORDER INFORMATION

MODEL	DESCRIPTION	OPTIC	ILLUMINATOR	I/O	ORDER N°
Smart-VS-MR-5-150-WH-0	SVS WP 150mm OUT	7mm	White polarized	3Out + 2In + ETH	959971320

ACCESSORIES

CATEGORY	PART NUMBER	DESCRIPTION
Cables	95A900052	CAB-GD03 M12 17P 3M stripped wires
	95A900053	CAB-GD05 M12 17P 5M stripped wires
	93A050122	M12-IP67 GIGA Ethernet Cable X-Coded (1M)
	93A050123	M12-IP67 GIGA Ethernet Cable X-Coded (3M)
	93A050124	M12-IP67 GIGA Ethernet Cable X-Coded (5M)
	93A050128	Adapter Cable GIGA Ethernet X-Coded M12 to RJ45
	93A050129	Adapter Cable GIGA Ethernet X-Coded M12 to D-Coded
Bracket	93ACC0230	BK-22-000 Fixing Bracket M220 Body
